

PROPOSAL

DATE: February 14, 1989

FROM: Upper Duchesne River Water Users

TO: Department of Natural Resources
Division of Water Rights
Robert L. Morgan, State Engineer

The Upper Duchesne River Water Users propose that the State Engineer grant a 5 acre foot usage on a trial bases on the Upper Duchesne River down to and including Pioneer Canal while the Department of Natural Resources oversee a ten (10) year study of the return flow.

The users feel that the 5 acre foot usage will be justified by the amount of the return flow to the river.

We propose that the proposed Duty Schedual for Zone 1 be adjusted to begin May 10th.

We the Upper Duchesne River Water Users propose that purchased storage water be delivered upon demand.

We would appreciate immediate action on the above proposals, as we feel that all the Duchesne Water users will benefit.
